

# City Of Los Santos Roleplay

**City of Los Santos Roleplay** was a FiveM server dedicated to providing an immersive role-playing experience in the virtual world of GTA V's Los Santos. Launched in November 2023 by Shaun Wynkoop, it serves as a revival of the once-popular Code 6 Roleplay server, which had seen a decline in member activity.

## Background and Inception

The inception of City Of Los Santos Roleplay was driven by the desire to reinvigorate the role-playing community that had once thrived in Code 6 Roleplay. Founder Shaun Wynkoop, a former member of Code 6, envisioned a server that not only recaptured the former glory of its predecessor but also introduced new elements to enhance player engagement.

## Community Engagement

Since its launch, City Of Los Santos Roleplay has hosted several successful patrols and events so far.

## Inactivity and eventual merge

Despite its initial success and the enthusiasm of its founding members, City Of Los Santos Roleplay faced challenges that led to periods of inactivity. By December 2023, the server experienced a downturn in member participation. Efforts were made towards end of December and throughout January to revive interest and engagement, but the combined pressures of busy lives and shifting priorities

among its community made sustainability difficult.
